

## **International helo Sauna & Spa Academy**

### **Training offers for architects and project planners**

The International helo Sauna & Spa Academy started up in Knüllwald-Wallenstein (Germany) this summer. The objective of this academy, which was initiated and implemented by helo GmbH, the German subsidiary of the globally operative helo Group, is to communicate comprehensive knowledge of the variety of possibilities, technologies and product details of the helo sauna and spa range to everyone who is professionally involved with the planning, sales and integration of sophisticated sauna and spa facilities. Following the completion of their seminar, all seminar participants receive a qualification certificate, which certifies them as authorised helo specialist advisors for saunas, infrared cabins, steam baths, sauna equipment and sauna accessories.

### **Intensive sauna, infrared and steam bath training**

The helo academy's training concept combines theory and practice in a special way. The respective seminar leaders not only make use of the modern conference equipment of the academy's conference room during the training sessions, but also have virtually the entire helo range of saunas, heaters and control equipment, sauna accessories, infrared heat cabins and steam baths at their disposal for practical applications. Thus planning examples are explained and technical knowledge for system planning as well as detailed material knowledge is communicated. No question remains unanswered and, if desired, the participants have the possibility to immediately put what they have learnt into practice in the Academy's fully functional helo spa area.

### **A hot tip: the architect's seminar with helo travel expense reimbursement**

With an exclusive training offer, helo is addressing architects and project planners who are quick off the mark and wish to bring their knowledge of planning and implementation of commercial sauna and spa facilities up to date and at the same time to gather information about the latest trends in this area. Because the first 15 participants who register for this training offer at the International helo Sauna & Spa Academy will have the costs of travelling to Knüllwald-Wallenstein reimbursed by

helo. The architect's seminar takes place on 18 and 19 February 2015 at the helo academy in Knüllwald (Germany). The minimum number of participants is five, the maximum fifteen. The closing date for registrations is 15 January 2015. Decisive for seminar participation with the reimbursement of travel expenses by helo is the order in which the bookings are received.

Please send registrations to:

helo GmbH, Hüttenmühle, D-34593 Knüllwald-Wallenstein (Germany)

### **The helo Group – operative worldwide in over 80 countries**

Helo GmbH from Knüllwald-Wallenstein is the German subsidiary of the worldwide operative helo Group. As the world's largest manufacturer of saunas, sauna equipment, infrared cabins, steam baths and sauna accessories, helo is present on the markets in more than 80 countries. The company's own development, design and production centres create top-class massive log and element saunas that are characterised above all by flexible floor plans, contemporary designs and energy-efficient heating equipment. The comprehensive product range is supplemented by the helo SUN S infrared cabins with the patented Pure Infra surface radiators, by professional steam bath equipment and by powerful sauna heaters with innovative controllers, which are developed and produced by helo in Finland.

### **helo project – expertise for large international projects**

The group-spanning helo project team combines the total expertise of every helo production plant in the world in order to implement tailor-made and innovative solutions for large public and commercial sauna and spa complexes for demanding investors. The many years of experience, the expertise and the synergies of highly-qualified specialists from every division of helo result in spectacular customer solutions from a single source, from planning to completion on site. With the specialist seminars at the International helo Sauna and Spa Academy, helo GmbH is now also offering architects and project planners the opportunity to benefit from this comprehensive helo knowledge so that they are then able to turn planning projects and the special requirements of their customers into reality.
